AP20 Rec'd PCT/PTO 17 JUL 2006

Att: Mr. Richard Ross

Dear Mr. Ross

re Application for National Phase Final Patent in the USA  
PCT ZA 2005/00 0009

On a personal note, I would like to thank you for taking my call yesterday and for clarifying some points regarding our patent application in the USA. As discussed, I am waiting for proof of payment from Exchange Control at First National Bank, Durban. As soon as I have it I will fax it through to USPTO on the number given: 571 273 3201. Payment of US\$700 with our PCT number as reference should reflect on the USPTO bank statement tomorrow.

The invention we seek to protect in the USA is truly a revolutionary angling tool which is already making waves in SA and overseas, excuse the pun. It is the world's first surf launched RC bait boat and can travel 1 000m into the ocean to drop baited hooks. It is also ideal for use on windy dams or in any rough water conditions as it is totally submersible and completely self righting. The little boats, decorated with flags and messages make perfect corporate advertising tools at water based events and can also be used for water rescue and underwater photography.

We have already successfully obtained patents and design registrations for our invention in South Africa, Namibia, Australia and New Zealand with further applications submitted to the EPO (30 European countries) and of course this application to the USA.

I trust that our application forms are all in order and hope that the additional documents supplied in support of our application will prove helpful.

Kindest regards,

Susan Barrett
